

Name _____

Tracking Weather Assignment

Assignment:

For ten days, you will need to fill in the table on the back of this page with the basic weather elements observed in our area. The information can be found at www.ksl.com.

Click on "Weather" on the upper bar. Click on "Details." You can also watch the weather report on this site, or any other local site, or watch the many local TV channels.

This assignment is tied to the Utah State Standards (standard 2, objective 1b). The "I Can" statement says that students can: observe, measure, and record data on the basic elements of weather over a period of time. This assignment is important, and will be counted as a test score on your grade.

The "other" column on the chart is for any information you found interesting on that day, or your personal recollections, predictions, etc.

Parents: Please help your scholars with this assignment. Check to ensure it is being completed daily. This assignment will be graded as a test score, so it will greatly affect their grades. Thank you for your help on this. If you need more information, don't hesitate to email me.

The assignment will be due on _____

Name _____

I can observe, measure, and record data on the basic elements of weather over time

[illegible]
